NEBRASKA PUBLIC LIBRARY PROFILE

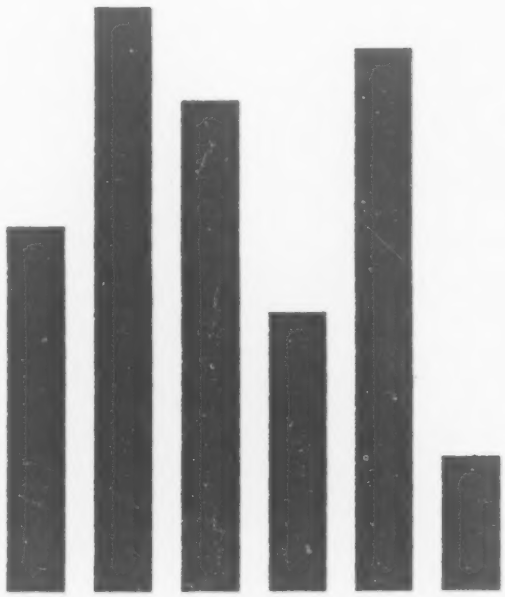
1985-86 Statistical Data



Nebraska Library Commission

January, 1988

PUBLIC LIBRARY PROFILE

Introduction

This summary of library statistics is based on data reported by Nebraska Public Libraries for the 1985-86 reporting period. The report differs somewhat from similar summaries in recent years. The report consists of the following parts:

-- A report on library services and resources, arranged by Library System, with System and statewide totals.

-- A report on library income and expenditures, similarly arranged.

-- A summary of data reported by libraries, arranged in eight categories of population size. This summary indicates the lowest, highest, average and total figures reported in each population category, and for all libraries reporting.

-- A cross index by library name, referring to the System and population category for each library.

This report attempts to provide increased analytical data based upon the statistics reported. In order to provide improved data for library planning, additional statistical information will be requested in future years, consistent with national programs for library measurement and data collection. Barbara Johnson will be responsible for collection and analysis of library statistical data at the Library Commission. A copy of the statistical files used in this report are available on diskette form. Those files are in Lotus 1-2-3 format for use on an IBM compatible microcomputer. Copies may be requested from:
